WORK EXPERIENCE

Senior Dynamics 365 F&O Developer

Balsoft GmbH | September 2026 – Present
D365 F&O development and integrations for Balsoft's customers, with release and production support.

Dynamics 365 F&O / AX Developer

Uzman ERP | January 2023 – August 2026
D365 F&O and AX 2009/2012 projects for manufacturing, industrial and holding-group customers.

Dynamics AX Developer

TD SYNnex | November 2021 – January 2023
In-house AX 2009 development, B2B integration, testing and go-live support.

Dynamics AX Developer

Colin's | October 2020 – November 2021
AX 2009 and AX 2012 development with .NET B2B and B2C integrations for apparel retail.

Dynamics AX Developer

Uzman ERP | February 2019 – October 2020
AX 2009 and AX 2012 customization and integration for manufacturing and retail customers.

Dynamics AX Developer

AGC Yazılım | October 2014 – January 2019
AX 2009 implementations for a lock manufacturer and a technology distributor: B2B, CRM, barcode.

PROJECTS

IMPLEMENTATION AND DEVELOPMENT | D365 F&O, AX 2012, AX 2009

2014 – 2026 | Projects for manufacturing, retail, distribution and holding-group customers

- Building materials manufacturer, D365 F&O (2023 – 2026): local development landscape with Onebox and Devbox servers connected to Azure DevOps, package merge and LCS upload to the sandbox; X++ customization across Finance, Sales, Purchase, Inventory and Production.
- Industrial holding group and refrigeration manufacturer, AX 2012 (2023 – 2026): new AOS and SQL Server instances installed and configured, ongoing technical support.
- Technology distributor, AX 2009 (2021 – 2023): in-house development for distribution processes, unit and integration testing, authorization setup, go-live support.
- Apparel retailer, AX 2009 and AX 2012 (2020 – 2021): development for retail and wholesale processes, AX 2012 installation and configuration.
- Lock manufacturer and technology distributor, AX 2009 (2014 – 2019): two implementations delivered from scratch, with tests, authorization setup and go-live support.

INTEGRATIONS | BANKING, E-INVOICING, B2B

Interfaces between Dynamics and external platforms, built in C# and X++

- Banking, collection and direct-debit platforms connected to AX 2012 and D365 F&O through C# libraries and X++.
- E-invoice, e-dispatch and e-export modules supported, including compliance changes and error handling.
- B2B and B2C integrations in .NET between AX and sales channels, partner systems and CRM.

ENVIRONMENTS | AOS, SQL SERVER, AZURE DEVOPS, LCS

Environment setup and administration around the ERP

- AOS and SQL Server installation and configuration for AX 2009 and AX 2012 customers, MSSQL maintenance.
- D365 F&O development environments (Onebox, Devbox) with Azure DevOps source control and LCS deployments.

REPORTING AND WAREHOUSE | POWER BI, BARCODE

Data and process work on top of the ERP

- D365 F&O data entities shared for Power BI reporting.
- Barcode project for warehouse and production processes on AX 2009.
- End-user support and training after go-live.
